

EIP Enviro Awarded Best Sales Performance of 2010 for 3D Level Scanner by APM-Solutions, Israel

EIP Enviro has been awarded the 2010 Best Sales Performance of the Year award for the 3DLevelScanner by Mr. Ofir Perl-CEO of APM Automation Solutions during its international sales conference held at Tel Aviv, Israel in May 2011. EIP Enviro is the first and only associate in India of APM, Israel , with its dedicated sales and technical staff having installed / supplied hundreds of the advanced systems in the last few years.

An Innovative 3D Level Scanner technology is a non-contact, dust-penetrating sensor that takes multiple measurements in the bin / silo to provide highly accurate level , volume & Mass. Its unique software features provides 3D visualization tool to help detect material profile, sidewall buildup or bridging in a bin / silo.

“EIP Enviro is dedicated to providing the best technology to measure the difficult level challenges for Bulk solids & Powder applications . The 3D Level Scanner is ideal to achieve desire accuracy and reliable volume estimates,”

“EIP Enviro has built a diverse 3D Level Scanner installation base in India in industries including coal, coke, cement, aggregates, power ,mining & steel .

EIP Enviro – an ISO 9001:2008 certified company established decades ago , EIP is strategically focused on designing, manufacturing and marketing reliable, proven Level Measurement Systems for the measurement of bulk solid and liquid materials for the pulp & paper, power, cement, steel , mining, and concrete industries.
